BRINGING DOORS & TECHNOLOGY TOGETHER

Our new range of domestic external doors have been created with over 25 years of manufacturing expertise. Using thermally broken aluminium profiles – to protect against weather conditions and wear and tear – our doors are guaranteed to stand the test of time.

Your front door is your home's chance to make a lasting impression and says everything about your style, identity and individuality. Your door is an investment; something that separates you from the world after a long day, keeping your home safe, secure and stylish.

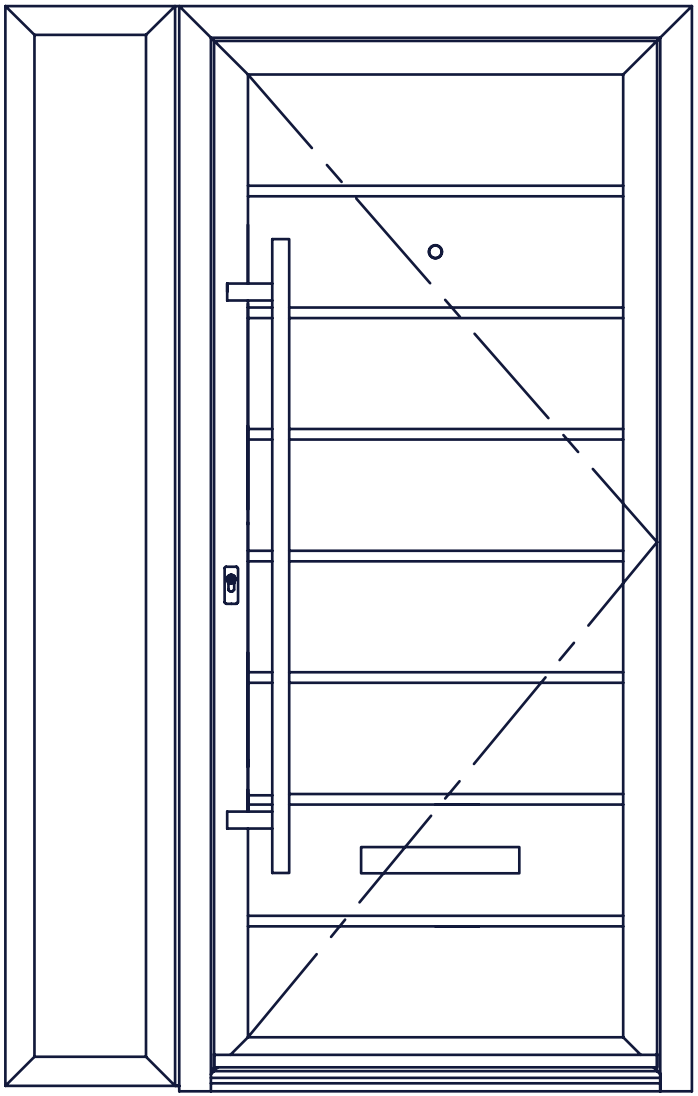

We've worked tirelessly on the look and feel of our luxury doors to set them apart from anything else available on the market. Every detail has been specially selected and developed to ensure a quality finish. We pride ourselves on products that not only look good, but function with the up most security and reliability.

SPECIAL FEATURES

- High thermal performance
- Low, non-trip threshold
- PAS 24 Security tested
- Reinforced aluminium panels for enhanced security
- Multi-Point locking
- Marine standard handles with two unique design options and sizes; rectangular, or circular profiles
- Marine standard powder coated finish to 60 microns
- Weather bars and drainage caps for enhanced weatherproofing

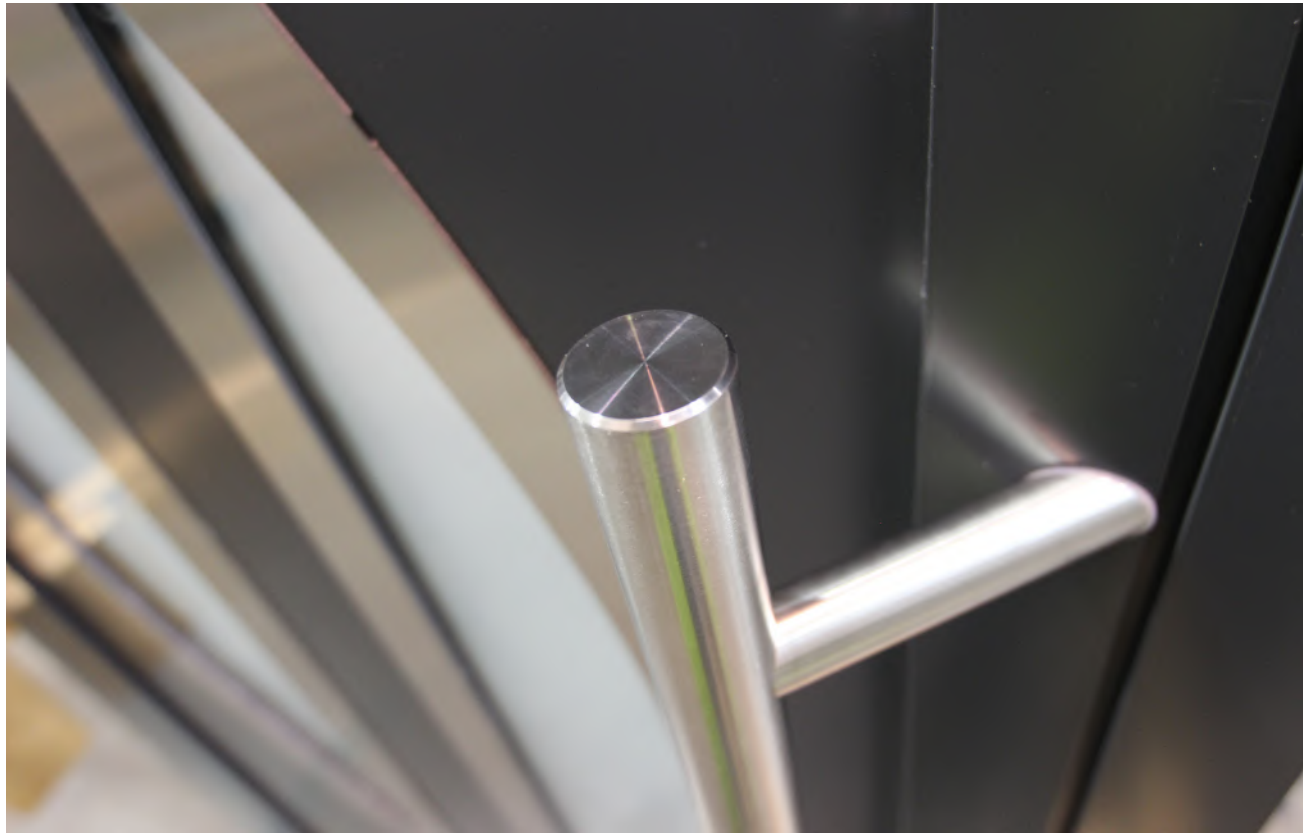

PAS24 Certified

HIGH-QUALITY ALUMINIUM & IRONMONGERY, IN EVERY DOOR

Our selection of enhanced domestic doors is complimented with ironmongery that has been specially selected for maximum security, quality and contemporary aesthetics.

Handles are constructed with high-performance, 316 marine grade stainless steel and are available in several stunning design options – including rectangular and circular – profiles depending on customer requirements.

Push and pull handles are available in either 600mm or 1,200mm height and are constructed with an offset design, to allow for easy access to the door lock.

Our letterplates are available in various colour ranges, with spring-loaded openers and weather-resistant, heavy-duty internal and external brush piles. To satisfy Secure by Design Standards, our doors are available with optional high-security spy holes.

Each of our doors is constructed using state-of-the-art security hinges – to provide maximum security – and has been tested to exceed the requirements of the PAS24 Standard. Dortech Doors is also UKAS accredited and is PAS 24: 2016 compliant.

Concealed Soft Closing Mechanism:

Our beautiful aluminium doors are also available with a concealed overhead closing device, which 'hold open' at 90 degrees. So if you need to carry heavy, or large objects in, or out of your house you need not worry. The door just require a light push, then just let the closer do the rest of the work. This is a great option if you want your door to close, but don't want to risk being locked outside your house.

Optional:

Danapad

Control your SMART lock with a wireless keypad, giving you secure easy access without the need to take a key out with you.

ULTION SMART LOCK

SMART KEYLESS ENTRY SYSTEM

Our secure locking system is available for push and pull handles and combine the traditional with the contemporary. They feature smart, keyless entry systems, to provide maximum convenience and security whilst seamlessly syncing with home smart systems, such as Alexa.

Featuring police approved security with Lockdown Mode snap protection

Features:

Set to Unlock on Approach
You can set Ultion SMART to unlock as soon as you approach the door without even touching your phone.

Auto Lock the Door Behind You
Never wonder if you locked the door again. You can set how long Ultion Smart stays unlocked for before securing the door again.

Send Guest Keys via Phone
Not at home and need to let someone in? No problem. You can send a digital key for timed or permanent access straight to a guest's phone by text or email.

Great Battery Life
Just 4x CR123A easy-to-change batteries provides an expected 1.5 years of usage. Keep track of battery life via the app!

Voice Controlled
Control Ultion Smart by asking your smart assistant for hands-free and phone-free locking.

Customisable Settings
Control everything from auto-unlock proximity range to lock timings with our free app, available on our Bluetooth & Alexa versions.

Powerful 12v Motor
The Ultion Smart 12v motor generates 1.5Nm of torque to ensure a secure and smooth operation on demand.

YALE CONEXIS LOCK

THE FUTURE OF DOOR LOCKS

Open the door to your world with the Conexis® L1 Smart Door Lock. Using advanced smart lock technology, secure your home without the need for a key.

Available in 5 colours

Features

Say goodbye to keys - the Conexis app allows your smart phone to become your key, so no more losing or hiding them.

Stay in control - the app allows access keys for both family and friends with time limit options. Smart technology allows you to revoke mobile keys, key cards, key tags and phone tags associated with your lock.

Know who comes and goes - have peace of mind knowing your loved ones are home safely. Receive notifications on who enters and leaves your home.

Battery Powered
No wires, no hassle. Easy to replace.

Go Keyless
Say goodbye to your traditional home keys.

Tamper Alarm
Protected by an internal alarm.

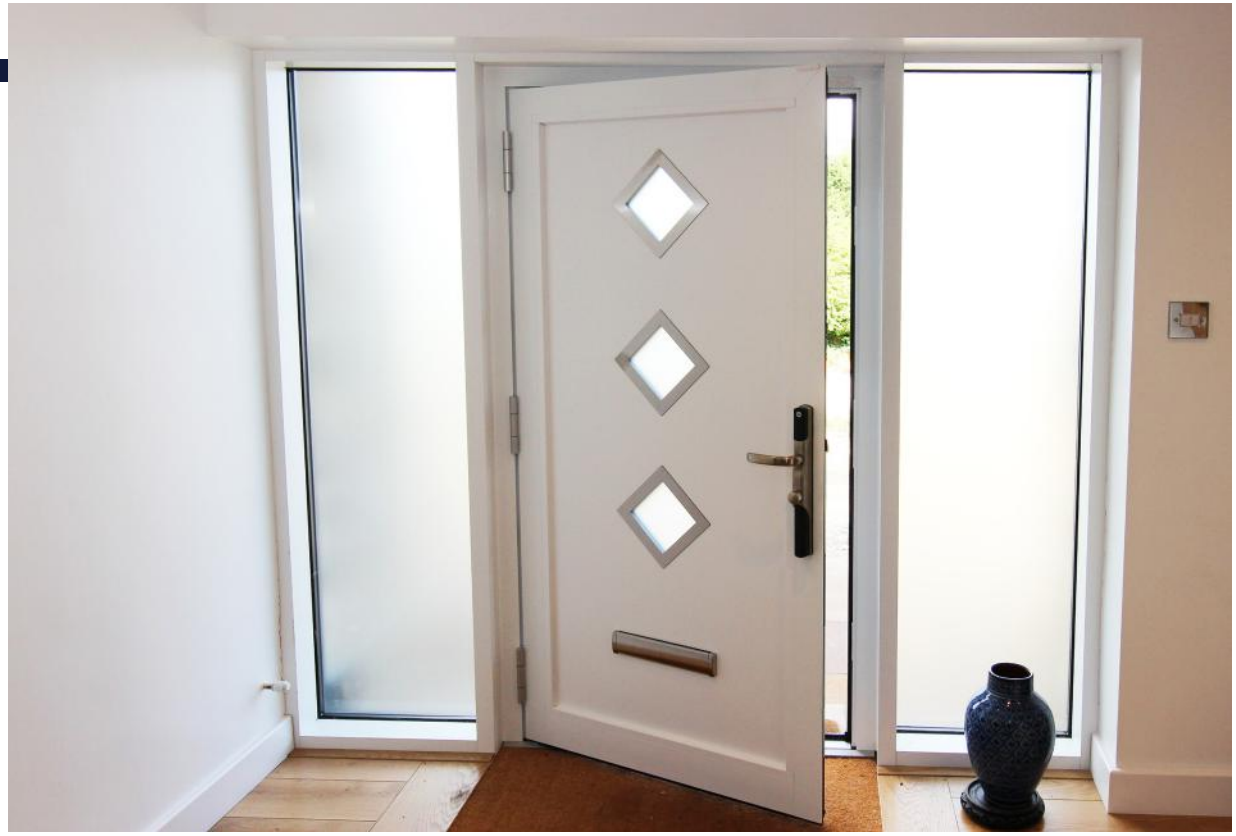

Send & Receive Virtual Keys
Control access from your Smart phone.

Easy to Fit
Get your Smart Door Lock up and running in no time.
