GAR_Side-Hinged_GarageDoors_151123.indd 4 17.11.23 13:26

Introducing the Garador side-hinged garage door

Garador's side-hinged garage doors have been engineered with an intuitively simple and easy-to-use design. They are ideal for garages where frequent access is required to store and retrieve larger items such as bicycles or garden tools. A lever handle is used to operate the door and both door leafs open outwards providing clear and unrestricted space within the garage.

Choose from an extensive selection of standard and made-to-measure door sizes. Three different materials are on offer to suit your garage's individual requirements, these are: steel, timber. Each material comes in a variety of designs and colours to suit. We also offer a range of matching garage side doors.

GAR_Side-Hinged_GarageDoors_151123.indd 5 17.11.23 13:26

Robust and reliable performance

Our side-hinged garage doors have been designed to provide years of reliable use and excellent security. A 75 mm wide galvanised steel door frame gives a strong and stable door construction. The hinges are concealed in the frame reducing their vulnerability to burglars and providing a seamless appearance across the surface of the door, as there are no hinge knuckles protruding.

GaraTip

3-way adjustable hinges allow the door position to be precisely adjusted for a smooth door action and a tight close against the rubber seal.

GAR_Side-Hinged_GarageDoors_151123.indd 6 17.11.23 13:26

Two-point locking for security

A shoot-bolt latch is used to secure the top and bottom of the fixed leaf. This is easily opened and closed using an espagnolette locking system, with a centrally located flip-up handle positioned in the middle of the door.

Door stays and dampeners

A door stay at the top of the door, helps to keep the door open and stops it blowing shut, if there are heavy winds. Gas pistons are employed as dampeners for a gentle closing motion.

Sturdy weatherproof rubber seals all round

There are strong weather proof seals built into the door frame and along the door stop on both the fixed and leading door leaf. This helps to prevent drafts inside the garage and keep the rain and wind outside.

Aluminium threshold

A 20 mm aluminium threshold blocks the flow of air that can pass underneath the door. It is angled facing outwards to allow for the passage of cars into the garage and for any mild water run-off.

GAR_Side-Hinged_GarageDoors_151123.indd 7 17.11.23 13:26

Modern appearance, classic steel design

Our steel side-hinged garage doors have a classic appearance that blends in with most homes. Choose from a range of traditional Georgian designs and more modern swage or wide profiled models.

Quality craftsmanship and exquisite timber designs

Our timber side-hinged garage doors combine quality craftsmanship with the exquisite beauty of real wood. We use the finest materials to build a door that will last for many years to come. Choose from Solid Cedar designs, constructed from Western Red Cedar, or Elizabethan ranges built from marine grade plywood and solid cedar.

Introducing the Garador insulated side-hinged garage door

Our insulated side-hinged doors provide easy access to quickly retrieve garden tools and bikes. Opening outwards they are ideal for garages with obstructions inside, that might impede a traditional garage door. With a double-skinned steel door leaf filled with insulating PU foam at 42 mm thick, these doors not only provide easy access but excellent thermal insulation as well. We also offer a range of matching garage side doors

GAR_Side-Hinged_GarageDoors_151123.indd 19 17.11.23 13:27

Thermally efficient and built to last

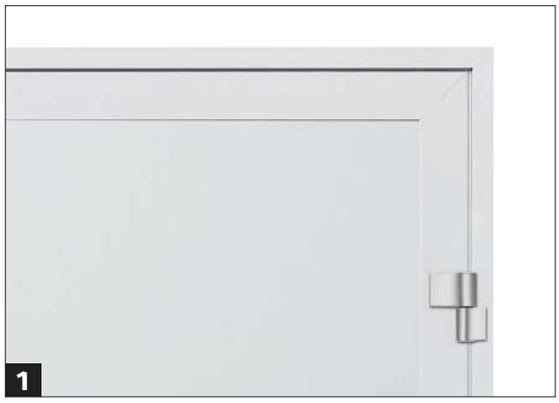

Garador's insulated side-hinged garage doors combine great thermal insulation with simple personal access. The door panel is 42 mm thick, encased in steel skins on both sides and filled with insulating PU foam, for great thermal performance. These doors are supplied with a frame that can be easily assembled on site, and three way adjustable hinges to ensure a quick and accurate installation.

GaraTip

3-way adjustable hinges allow the door position to be precisely adjusted for a smooth door action and a tight close against the rubber seal.

GAR_Side-Hinged_GarageDoors_151123.indd 20 17.11.23 13:27

Matching door leaf and frame

Timber effect and coloured insulated side-hinged doors are manufactured with identical door leaf and frame. The inside is finished in Grey White (RAL 9002). Hinge knuckles protrude from door surface and hinge covers supplied in black, white or natural aluminium finish.

Lever/ lever handle

Supplied with lever-lever handle set in black, white or natural aluminium, oval rose escutcheon and mortice lock as standard, as well as latching and locking of the fixed leaf at the top and bottom of the door. 3-point locking available as an option.

Fully insulated design

Our insulated side-hinged garage doors are highly thermally efficient and are therefore ideally suited to integral garages. These doors have U-values down to 2.9 W/m²·K

Frame and threshold

These doors are supplied with weatherproof aluminium extrusions, rubber seals all around the door and a double rubber lip seal along the threshold at the base of the door, creating a good seal and preventing drafts.

GAR_Side-Hinged_GarageDoors_151123.indd 21 17.11.23 13:27

5

Sealed all round
3-sided double door seal and double lip seal in the threshold area.

6

Door stay and dampener
Precision door stay and dampeners prevent the door from uncontrolled closing or opening, especially in windy conditions.

7

Robust hinge system
Robust hinges provide greater security and hinges are concealed on inside of door, for excellent safety inside.
